DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a system for predicting future values of a target metric associated with a task executed on a computer system.
 - II. Claims 15-24, drawn to an apparatus for periodically reconfiguring an adaptive computer system based on future behavior predictions.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as invention of group I disclose a system for predicting future values of a target metric associated with a task executed on a computer system, comprising a measuring instrument to measure at least one defined metric over a given period of time; a metric model for transforming said measurement into a value for a predictor source metric; and a predictor for using the value for the predictor source metric to obtain a predicted future value for said target metric and invention of group II discloses an apparatus for periodically reconfiguring an adaptive computer system based on future behavior predictions , comprising a predictor for assigning a dynamic priority to each of a group of tasks based on a history table based prediction of a future value for a characteristic associated with the task; and

a scheduler for selecting, at defined times, from said group the task having the highest dynamic priority to be executed by the computer system. Inventions I and II are different inventions

3. A telephone call was made to Attorney John S. Sensny on 04/14/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
